**Premium**

**Crown Bar Channel**

---

**Requirements**

**Limits**

Originals

Tensile (psi):

**2,000 min.**

Elongation (%):

**200 typical**

Durometer [shore A]:

**75 - 85**

Base Polymer:

**Premium Proprietary Material**

---

This proprietary material has comparable Abrasion Resistance to Urethane, but is less expensive. It can also be extruded in the same lengths of our current Channel products. It has proven to last through multiple screen changes and tuff applications, thus saving labor costs.

Currently this product is available in:

**RHPN: 380203-P      3/8" with 2" O/A Round Top Channel**

**RHPN: 380202-P      3/8" Heavy Hex Flat Top Channel**
